

SCF Arizona your business partner in Workers
Compensation Insurance and workplace safety

SCF changing to improve service for you

Provided by Ed Redmond
Association Coordinator

SCF Arizona is making giant strides in reinventing itself to serve Arizona employers and their employees as well as our association partners in more efficient ways and to reward our safest customers.

SCF and its subsidiary companies are proud to provide innovative workers' compensation insurance solutions to businesses that seek the best in workplace safety protection, an achievement we've managed for more than 85 years.

At SCF we strive to make experiences for policyholders the best they can be, because loyalty is critical to our success. We improve the resources you need to manage business costs effectively and to make your workplace safer: **because safe businesses save money.**

In return, SCF has helped to keep Arizona workers' compensation rates among the lowest in the nation.

During the past 12 months, SCF has made improvements to make provide better customer service. For example, our website, www.scfaz.com, now operates around the clock, so policyholders and injured workers can

- View claims
- Enter payroll
- Print certificates of insurance
- Pay premium by credit card at their convenience.

Free safety training materials are available as are streaming videos, interactive quizzes and even a Quick Quote option, which takes only three easy steps.

As we continue to listen to our partners in safety and our policyholders, the SCF website will continue to undergo changes as we add more tools this year.

In 2009, SCF Arizona created three subsidiary insurance companies to better serve its policyholders: SCF Western Insurance Co., SCF General Insurance Co., and SCF Casualty Insurance Co. These additions to SCF Arizona and SCF Premier Insurance Co. allows us to reward customers with pricing options based on a company's size, loss history and safety record, effectively customizing policies for a better business fit.

Policyholders often take advantage of the professional expertise we offer as a partner in safety and in workers' compensation. SCF's loss control consultants help clients to create safety plans, conduct safety audits and develop such cost-saving strategies as Return-to-Work programs.

With its historic roots in Arizona, SCF has the insight and expertise to serve our state's businesses. Employers have depended on us – in good times and bad – whenever they've needed help with workers' compensation insurance. We remain committed to being at work for you.
